day / date:

1) Where are threatened animals?

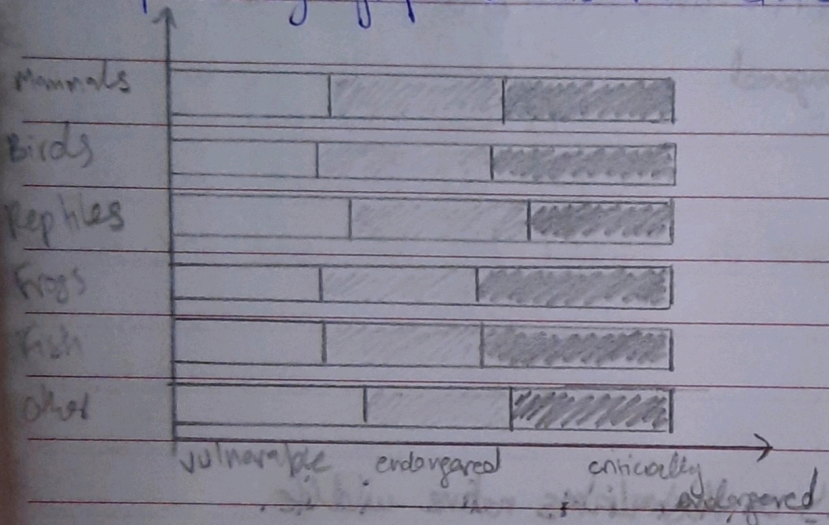

- which states have the most threatened species?

1) Choropleth Map - number of threatened animal species by state / territory

- 500 +
- 100 - 200
- < 50

2) Species by group and conservation status

2) Where do they live?

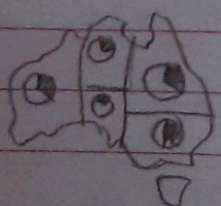

- mapping the habitats and locations of threatened species

3) Species Occurrence Map - locations of selected threatened species

- Southern Corroboree Frog
- Northern Quoll
- Greater Bilby

4) Threatened Species Vs Protected Areas - no. of threatened species & protected areas coverage by state.

- protected area %
- threatened species

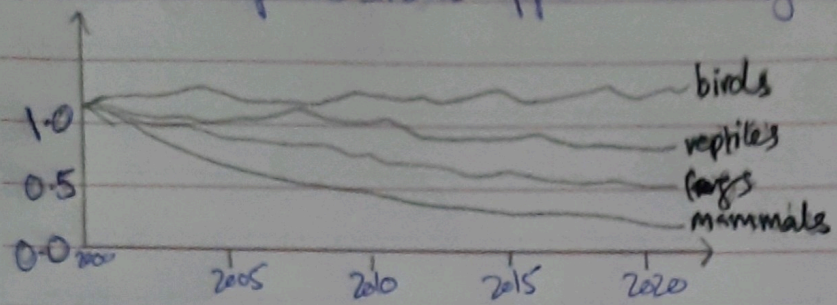

KAGHAZ

day / date:

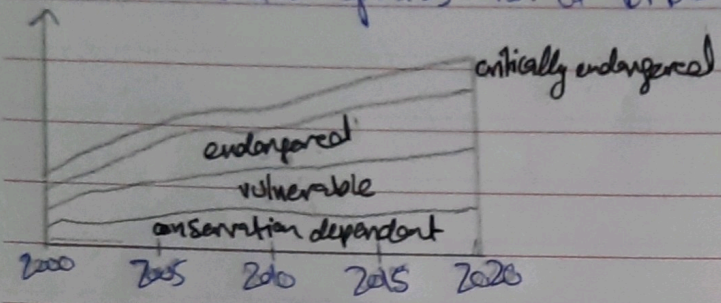

3) Are they recovering?

└ exploring long-term trends in species protection & population health.

5) Threatened Species Index - population trends by animal group (2000-2021)

6) Growth in Listed Species - no. of EPBC-listed fauna by category over time

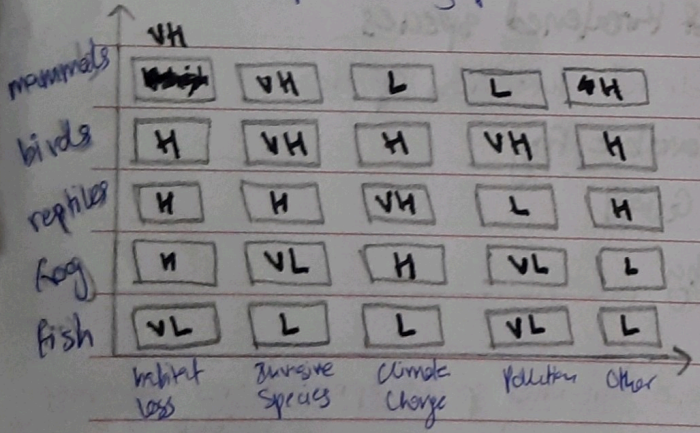

4) What threatens them?

└ understanding the key pressures on Australia's native wildlife.

7) Threats to Animal Groups

└ heatmaps showing prevalence of threats.

very high = VH
high = H
low = L
very low = VL

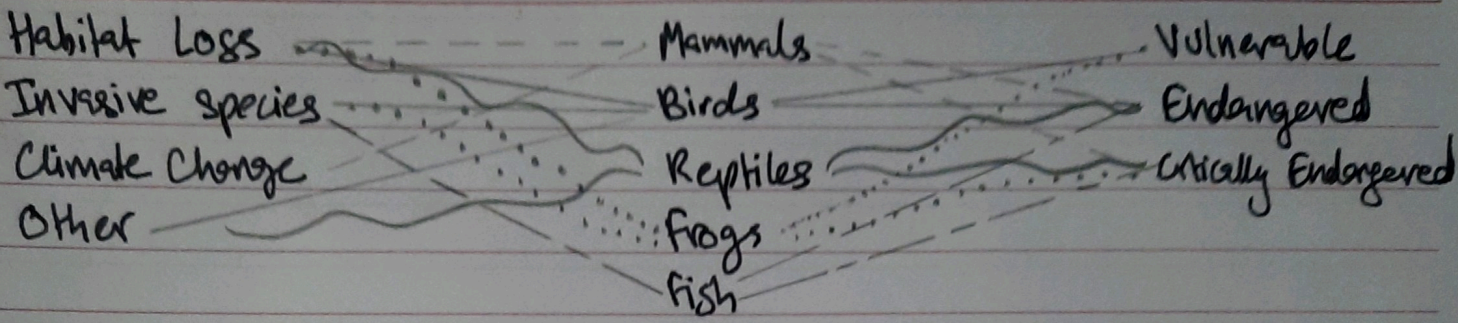

8) How Threats Connect

└ flow of threats → animal groups → conservation status

day / date:

9) Multiple threats

↳ number of threats affecting threatened species.

2	3	4+	2	2	2	4+ threats
2	3	4+	3	2	2	3 threats
2	2	3	2	2	1	2 threats
2	2	2	2	1	2	1 threat
3	2	3	2	2	1	

=> Many species face multiple pressures.
